

This is what all the talk is about: the new Dataspeed[®] 40 service from the Bell System

Lots of people have been talking about our Dataspeed 40 data terminal. That's because one integrated design now includes a visual-display unit, a keyboard and a line-at-a-time impact printer.

But since this design consists of separate modules, you can select only the capabilities you need now at each of your installations, and add others later.

Dataspeed 40 service combines high-speed transmission with easy preparation and editing of data.

It operates at 1200 b.p.s. over either the switched network or private line. And the printer offers you speeds of 5.2 lines per second in mono case and 3.7 lines per second in upper/lower case. The terminal was human-engineered for maximum operator ease and minimum fatigue and error.

In addition to its innovative technology, Dataspeed 40 service brings you the assurance of equipment built to Bell System standards. And installation and maintenance by your local Bell Company. Check with your Communications Consultant for further details and availability.

You've been saying you need service just like this. We hear you.
